SUMMARY

Target Roles : SDE | APP Developer | AI Engineer | Infosec/Cybersecurity Analyst | Backend Developer | MLOps

AI and Full Stack Engineer with experience building scalable applications, autonomous AI systems, and cross platform products using React, Flutter, FastAPI, PyTorch, and TensorFlow. Skilled in machine learning, deep learning, NLP, computer vision, and backend development with hands on experience in deploying production ready solutions using Docker, Firebase, and MongoDB. Passionate about building intelligent systems, developer tools, and AI driven user experiences with a strong focus on performance, scalability, and real world impact.

EDUCATION

BE in Civil Engineering, Minor in Robotics & Automation, BITS Pilani, Hyderabad Campus 08/2023 – 07/2027

SKILLS

- Artificial Intelligence & Machine Learning: Hugging Face, PyTorch, TensorFlow, ML Basics, RL, NLP, Transformers, Computer Vision, Agentic AI, Gen AI, LLM Integration(Gemini, gpt-4,), Prompt Engineering
- Frontend Development: Next.js, GSAP, PHP, React.js, TypeScript, JavaScript, Zustand, Zod,
- Backend Development: Python, Node.js, FastAPI, REST APIs, Database Management
- Mobile App Development: SwiftUI (iOS), Flutter (Cross Platform), React Native & expo
- Databases & DevOps: MongoDB, Firebase, Git, Docker, Supabase, APPwrite,

EMPLOYMENT HISTORY

- Blueberry Digital Labs, Full Stack Software Engineer Intern** 05/2024 – 08/2024
Hyderabad
- Developed calculators using React.js
 - Wrote API contracts and collaborated with frontend engineers
 - Worked with React framework and PHP
- Swecha Foundation  , AI Intern + Flutter Developer Inter** 05/2025 – 08/2025
Hyderabad
- Built AI agents and deployed via Hugging Face and Docker
 - Learnt how to use ollama for the better of code architecture and resolving issues
 - Led Flutter app development for multilingual dataset collection
 - Built monitoring tool for interns activity and GitHub stats
- NOSH Euphotic Labs, Back End Developer** 05/2025 – 09/2026
Bangalore, Hybrid
- Led a team for building a grocery ordering system using Instacart and Walmart (ACM BITS Hyderabad)
 - Integrated APIs for cart automation
- BITS Hyderabad  , App Developer** 11/2025 – 02/2026
Hyderabad
- Built a cross-platform Flutter application with offline-first architecture using SQLite and Firebase integration
 - Integrated OpenAI GPT-4, Krea AI, and Whisper APIs for AI-generated idol designs, image enhancement, Bengali speech-to-text, and multilingual workflows
 - Designed and implemented voice-enabled financial ledger (“Voice Khata”) for transaction recording in Bengali
- Loomlane  , Back End Developer** 11/2025 – 02/2026
Remote
- Migrated backend from Supabase to MongoDB
 - Implemented Google OAuth
 - Integrated Razorpay and Stripe payments
 - Implemented JWT authentication and refresh flow
- GOMARG  , AI + GTM Engineer** 06/2026 – 07/2026
Remote
- Architected a scalable B2B sales automation platform using Next.js 16 (App Router) and FastAPI (Python)
 - AI Agent & Prompt Engineering Pipeline: Built an AI email generation engine using the Gemini LLM to integrate unstructured data into highly personalized sales outreach

- **Automated Data Sourcing & ETL Pipeline:** Engineered an asynchronous data synchronization pipeline integrating the **Apollo API** to automatically capture and store metadata (from 250M+ records)
- Synthsports**  , *Founding Engineer* 06/2026
- Newly growing startup backed by UC Berkeley Skydeck, PAD 13, Microsoft for startups, Google for startups and NVIDIA inception Berkeley, USA, Hybrid
 - Architected backend integration for AI training plans,
 - Built and shipped native mobile experiences using React Native and Expo
 - Engineered an activity detection pipeline by hooking into ingested workout data (Strava, Apple Health, Whoop) eliminating hardcoded mock flows and enabling dynamic workout data

PROJECTS

Aether, *AI Cognition Replay & Observability Platform*

Designed and developed a production style AI observability platform for autonomous agents featuring cognition replay, hallucination detection, tool call tracing, and self correction visualization.
Built responsive graph rendering systems using React Flow and custom SVG DAG engines with animated execution traversal, timeline scrubbing, telemetry safe local execution, and VSCode extension integration.
Implemented developer onboarding systems, Supabase authentication, responsive runtime graph layouts, and interactive replay dashboards for SDK.
<https://aether.vercel.app> 

Crisis Communication Environment

Multi turn OpenEnv environment for training and evaluating agents on crisis communication. The agent must manage an unfolding organizational crisis across four stakeholder audiences while new facts, planted falsehoods, deadlines arrive over time.
https://github.com/Samanyu-dev/crisis_comm_env.git 
https://huggingface.co/spaces/Sammy1808/crisis_comm 

Network Performance

By using deep neural networks such as LSTM, CNN, Transformers, Autoencoders and GANs the study demonstrates how machine learning can automate network monitoring, reduce downtime, and improve resource allocation in real time environments.
https://github.com/Samanyu-dev/Network_Performance.git 

Self Driving Car RL

A RL agent which uses behaviour cloning to collect and learn from the dataset and use it to teach a neural network to drive a simulated car autonomously

HACKATHONS

Goldman Sachs India Hackathon 2026 , <i>CS Theme</i>	05/2026 – 05/2026
Rank : 3189	Remote, Hyderabad
Meta OpenEnv HF Scaler , <i>Crisis Communication Environment</i>	04/2026 – 04/2026
– Finals : Top 100 Teams out of 800+ Finalist Teams	Bangalore, India
– Round 1 : Top 1500 out of 52000+ Participants	
IQC World Quant Brain 2025 , <i>Alphas</i>	Remote
– Finalist	
– Round 2 - top 20%	
– Round 1 - top 20% (Rank : 420)	
Steps AI Hackathon  , <i>AI Interview Platform</i>	05/2026 – 05/2026
– Single Round Hackathon - Rank 9 / 31	Hyderabad
Algo University , <i>Dynamic Programming Camp</i>	05/2026 – 05/2026
Applicants : 40000+	Hyderabad
Shortlisted : 4000	
Completed and received certificates : 1000 (me)	
Nomura Global Markets Quant Challenge 2026 , <i>Quantitative Finance & Market Making Competition</i>	06/2026 – 06/2026
Built Python/C++ solutions for pricing, risk analytics, client profitability, adversity prediction, and dynamic quoting using statistical modeling and automated backtesting.	Remote

CERTIFICATES

Prompt Design in Vertex AI Skill

Google Cloud Skills Boost

- Artificial Intelligence (AI)
- Gemini API
- Generative AI
- Prompt Engineering

Hackathon Certificates

All of my hackathon Certificates

Work Certificates

All of my internship certificates and freelance work
