EDUCATION

BE in Civil Engineering, Minor in Robotics and Automation, BITS Pilani, Hyderabad Campus

08/2023 – 07/2027

SKILLS

- Artificial Intelligence & Machine Learning: Hugging Face, PyTorch, TensorFlow, ML Basics, RL, NLP, Transformers, Computer Vision, Agentic AI
- Frontend Development: Next.js, GSAP, React.js, TypeScript, JavaScript
- Backend Development: Python, Node.js, FastAPI, REST APIs, Database Management
- Mobile App Development: SwiftUI (iOS), Flutter (Cross-Platform)
- Databases & DevOps: MongoDB, Firebase, Git, Docker

EMPLOYMENT HISTORY

- Full Stack Software Engineer Intern, Blueberry Digital Labs

- Developed calculators using React.js
 - Wrote API contracts and collaborated with frontend engineers
 - Worked with React framework and PHP

05/2024 – 08/2024
Hyderabad
- AI Intern, Swecha Foundation

- Built AI agents and deployed via Hugging Face and Docker
 - Learnt how to use ollama for the better of code architecture and resolving issues
 - Led Flutter app development for multilingual dataset collection
 - Built monitoring tool for interns activity and GitHub stats
 - <https://code.swecha.org/corpus/mobile.git>

05/2025 – 08/2025
Hyderabad
- Back End Developer, NOSH Euphotic Labs

- Led a team for building a grocery ordering system using Instacart and Walmart
 - Integrated APIs for cart automation

05/2025 – 09/2026
Remote
- App Developer, BITS Hyderabad

- Built a cross-platform Flutter application with offline-first architecture using SQLite and Firebase integration
 - Integrated OpenAI GPT-4, Krea AI, and Whisper APIs for AI-generated idol designs, image enhancement, Bengali speech-to-text, and multilingual workflows
 - Designed and implemented voice-enabled financial ledger (“Voice Khata”) for transaction recording in Bengali
 - <https://github.com/Samanyu-dev/durgapuja.git>

11/2025 – 02/2026
- Back End Developer, Loomlane

- Migrated backend from Supabase to MongoDB
 - Implemented Google OAuth
 - Integrated Razorpay and Stripe payments
 - Implemented JWT authentication and refresh flow
 - <https://github.com/Loomlane/Loomlane.git>

11/2025 – 02/2026
Remote

PROJECTS

- Aether, AI Cognition Replay & Observability Platform

Designed and developed a production style AI observability platform for autonomous agents featuring cognition replay, hallucination detection, tool call tracing, and self correction visualization.
Built responsive graph rendering systems using React Flow and custom SVG DAG engines with animated execution traversal, timeline scrubbing, telemetry safe local execution, and VSCode extension integration.
Implemented developer onboarding systems, Supabase authentication, responsive runtime graph layouts, and interactive replay dashboards for SDK.
<https://aether.vercel.app>
- Crisis Communication Environment

Multi turn OpenEnv environment for training and evaluating agents on crisis communication. The agent must manage an unfolding organizational crisis across four stakeholder audiences while new facts, planted falsehoods, deadlines arrive over time.
https://github.com/Samanyu-dev/crisis_comm_env.git
https://huggingface.co/spaces/Sammy1808/crisis_comm
- Network Performance

By using deep neural networks such as LSTM, CNN, Transformers, Autoencoders and GANs the study demonstrates how machine learning can automate network monitoring, reduce downtime, and improve resource allocation in real time environments. https://github.com/Samanyu-dev/Network_Performance.git
- Oracle Agent

built an agent called Oracle that has to navigate through a grid full of hazards and reach the goal without dying. The grid has volcanoes, water bodies, land, and brick walls. The agent starts at the top left corner and has to reach the bottom right corner.
<https://github.com/Samanyu-dev/oracle-agent.git>
<https://huggingface.co/spaces/Sammy1808/oracleagent>

HACKATHONS

Goldman Sachs India Hackathon 2026 , <i>CS Theme</i> Rank : 3189	05/2026 – 05/2026
Meta OpenEnv HF Scaler , <i>Crisis Communication Environment</i> – Finals : Top 100 Teams out of 800+ Finalist Teams – Round 1 : Top 1500 out of 52000+ Participants	04/2026 – 04/2026 Bangalore, India
IQC World Quant Brain 2025 , <i>Alphas</i> – Finalist – Round 2 - top 20% – Round 1 - top 20% (Rank : 420)	

SUMMARY

AI and Full Stack Engineer with experience building scalable applications, autonomous AI systems, and cross platform products using React, Flutter, FastAPI, PyTorch, and TensorFlow. Skilled in machine learning, deep learning, NLP, computer vision, and backend development with hands on experience in deploying production ready solutions using Docker, Firebase, and MongoDB. Passionate about building intelligent systems, developer tools, and AI driven user experiences with a strong focus on performance, scalability, and real world impact.

CERTIFICATES

- Prompt Design in Vertex AI Skill** 
- Google Cloud Skills Boost
 - Artificial Intelligence (AI)
 - Gemini API
 - Generative AI
 - Prompt Engineering
